TSA Recurrent Security Awareness Training for CFIs

CFI Training Syllabus

INTRODUCTION

The King Schools TSA Recurrent Security Awareness Training for CFIs Course meets the pilot training requirements for recurrent security awareness training prescribed by 49 CFR Part 1552.23(d). This course:

- Provides the training specified in 49 CFR 1552.23(d) for annual recurrent security awareness training
- Includes resources for additional study and reference
- Provides a completion certificate and logbook endorsement
- Is offered only through individual Internet study
- Is efficient and practical

COURSE ELEMENTS AND STRUCTURE

The King Schools TSA Recurrent Security Awareness Training for CFIs Course contains one major subject area (Lab) with five distinct Lessons. Following each Lesson's study materials, the pilot sees a quiz containing multiple-choice and/or True/False questions. There are approximately 27 questions in the course. Most pilots will require at least an hour to complete this course.

Participants will:

- Understand the background of Transportation Security Administration requirements for flight training
- Be able to determine when TSA approval is necessary
- Understand how flight instructors and customers are to follow TSA procedures
- Be reminded of TSA initial security awareness training and recurrent training requirements
- Complete the requirements to satisfy their annual recurrent training

COMPLETION STANDARDS

Pilots complete the course when all the Lessons are checked off with a completion date on the course main menu. Lesson completion requires accessing each lesson page of study materials and correctly answering all questions in the quiz associated with that Lesson.

CERTIFICATE OF COMPLETION

A Completion Certificate individualized for the pilot enrolled in the course and a logbook endorsement may be accessed at the "Print Your Course Complete Materials, Endorsement, and get Wings Credit" icon on the main menu only after the entire course has been completed. Pilots clicking on this icon before the course has been completed receive a message saying that the certificate will be available after the entire course is completed.

ENROLLMENT PROCEDURES

A pilot may individually order and enroll in the course, or flight departments may order multiple courses and receive a “key” for each course ordered. The flight department then assigns a key to each pilot requiring training. Each pilot registers individually at ilearn.kingschools.com for the course.

COURSE STUDY

The pilot first enrolls in the course, and then logs in to access the course Lab and Lessons. If the pilot has insufficient time to complete the course in one session, the pilot may log out. The program records all Lesson and Lab completions and every question answered. When returning to the course, the pilot may resume at the last point of progress.

LAB 1

WHAT YOU NEED TO KNOW ABOUT THE TSA

LESSONS

1 **Introduction and History**

Lesson Objective: To learn the background of Transportation Security Administrations requirements for flight training.

2 **Definitions You Need to Know**

Lesson Objective: To learn the TSA definition of specific terms used in flight training.

3 **Flight Training Rules**

Lesson Objective: To learn TSA administrative requirements before flight training can begin.

4 **Security Awareness Training Requirements**

Lesson Objective: To learn TSA training requirements for flight instructors.

5 **Recurrent TSA Security Awareness Training**

Lesson Objective: To review recurrent TSA training topics required by 49 CFR 1552.23(d).
